About

OMEGA'S
IMPACT Series
OF PACKAGING EQUIPMENT

- Low cost machine configurations
- Save 20-40% on this machine
- Get faster lead times (6-10 weeks)

UTILITIES:

- Voltage: 120 VAC, 50/60 Hz
- Air: none
- Utilities may vary per client specifications

CONTROLS:

- Integrated color Touch Screen HMI
- Stepper motors

SPEED:

- Up to 150 desiccants per minute

STANDARD FEATURES:

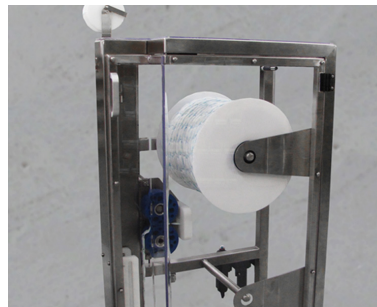

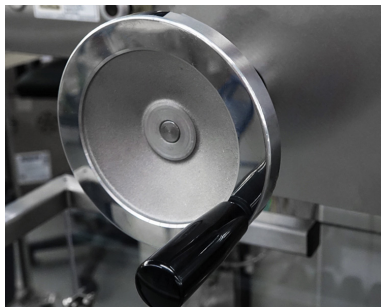

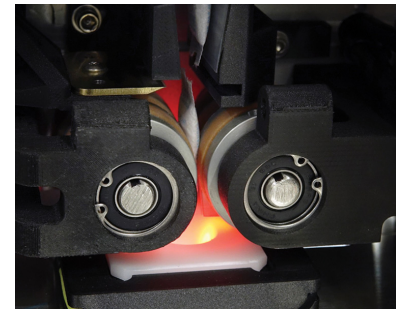

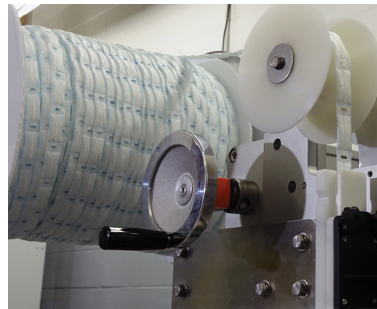

- Anodized aluminum frame
- Pouch reel support
- Slim line dispensing head
- Casters

OPTIONS:

- Bottle control handling systems
- Down bottle reject system
- Dual pouch reel storage cabinet with casters
- Guard package
- UL panel
- Validation support documentation

OPERATION:

An operator loads a pouch reel onto its spindle and then feeds the desiccant strip into the dispensing head. He then adjusts the machine for the next bottle run. This automatic feeder will cut individual pouches from its strip, dispense a desired quantity, and verify the pouches have exited the machine.

Reminder Ask about our excellent track record of on-time deliveries and industry-leading FATs. Better yet, read what our clients have to say: www.omegadesign.com/testimonials
