OMEGA'S  
**IMPACT** Series  
OF PACKAGING EQUIPMENT

- Low cost machine configurations
- Save 20-40% on this machine
- Get faster lead times (6-10 weeks)

**UTILITIES:**

- Voltage: 120 VAC, 50/60 Hz
- Air: 1 SCFM @ 30 psig
- Utilities may vary per client specifications

**CONTROLS:**

- Allen Bradley PLC
- Selector switch for number of drops

**SPEED:**

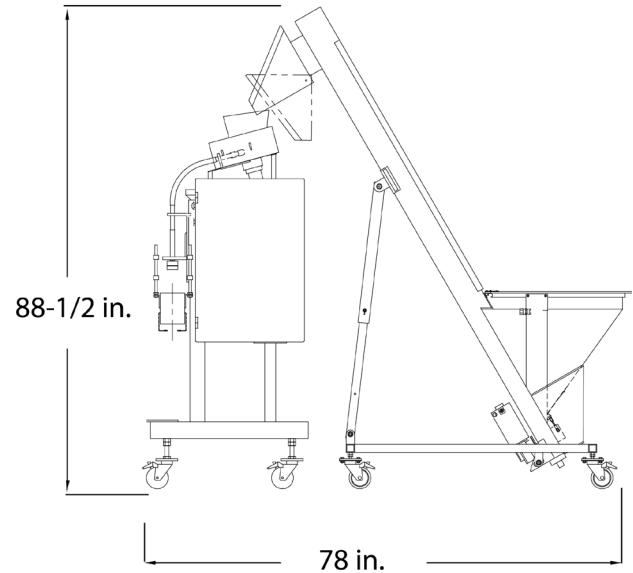

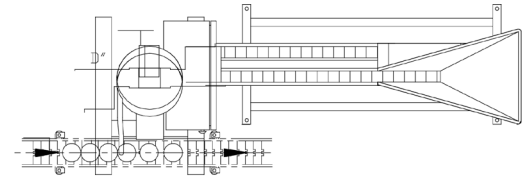

- 100 desiccants per minute (1 drop into 75cc bottle)
- 60 desiccants per minute (2 drops into 75cc bottle)
- 45 desiccants per minute (3 drops into 75cc bottle)
- 30 desiccants per minute (4 drops into 75cc bottle)

**STANDARD FEATURES:**

- 10 gallon floor level hopper with elevator
- Casters
- Stainless steel frame
- Electrical safety Interlocks

**OPTIONS:**

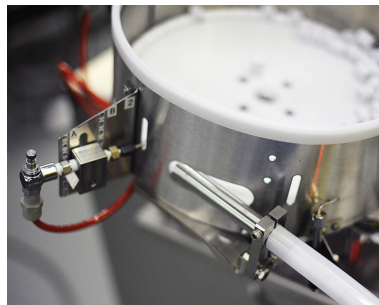

- Hopper upgrades
- UL panel
- Validation support documentation

\* Layout and dimensions may vary per application.

**OPERATION:**

An operator loads canisters into the floor level hopper. A vertical elevator belt transfers the canisters into a sorter, down a chute, and onto a dispensing plate. A holdback cylinder will keep a bottle in position until the desired quantity of canisters get dispensed and verified.

**Reminder** Ask about our excellent track record of on-time deliveries and industry-leading FATs. Better yet, read what our clients have to say: [www.omegadesign.com/testimonials](http://www.omegadesign.com/testimonials)
