# Omega Disc Sorter Upgrade

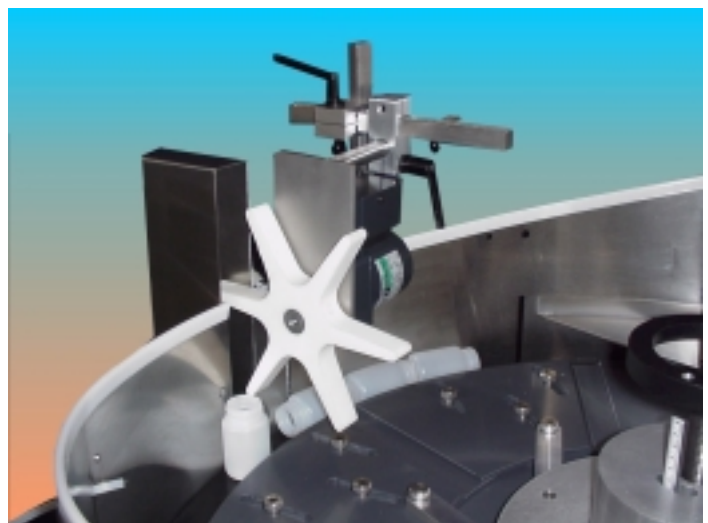

## Paddle Wheel

Original Design: Non-scaled, multiple adjustments (up to 6)

---

Redesigned Paddlewheel: Scaled, no tools required, only 2 adjustments

# **Omega Disc Sorter Upgrade**

## **Paddle Wheel**

The original paddle wheel had up to six (6) adjustments, which is time consuming and can create inconsistency from one changeover to another. The redesigned paddle wheel is scaled for easy reference and repetitive changeovers, has only two (2) adjustments and is guarded for operator safety.

The estimated installation time at the customer facility is 4 hours.

The customer or an Omega Design Service Technician can install the upgrade.
