Managing Obsolescence

PLC Upgrade/Shrinkbundlers

The Omron S6 and Allen Bradley L30L PLC's are no longer available. The Omron S6 has not been supported by Omron for several years and Allen Bradley has offered limited support for the L30L.

The replacement for either of the above units is the Allen Bradley SLC 5/01. The SLC 5/01 is expandable for current and future growth needs. Processing speed is faster. It incorporates RS Logic and is fully supported.

Also available are Allen Bradley's higher end PLC's such as 5/03, 5/04 or 5/05 which offer data highway and Ethernet communication capabilities.

A factory Service Technician is required for installations. Consult factory for more information.
