

Omega Design's

REMOTE INTEGRATION

Vendor-Ready Serialization Equipment for Clients & Integrators

Omega manages

Omega hands off project to the client or integrator

Remote Integration is a platform that allows Omega to handoff its serialization equipment and controls to a client or integrator, who might prefer to purchase, manage, integrate and test their own vision and data systems at their chosen location.

AVAILABLE MODELS

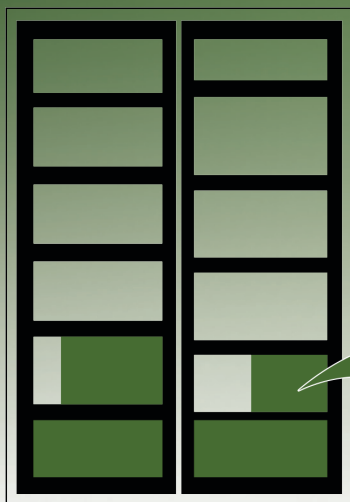

- **Intelli-Pac (manual):** Serialized Case Aggregation
- **Intelli-Pac (semi-auto):** Serialized Case Aggregation
- **Intelli-Code:** Carton Coder and Inspection System

INCLUDES

- Serialization-ready equipment
- Controls package
- Drawing package, I/O signals, integration guide
- Space in electrical enclosure for vendor components
- Brackets, mounts and hardware
- Optional validation documentation

HIGHLIGHTS

- Proven solution with superior product handling
- Mobile solution
- More flexibility (for system integration, site testing)
- Faster lead times (for hardware)
- Simplified hand-off

Omega reserves space inside its electrical panel for your vendor's components and space for your vendor's industrial PC
